

SOUTHEASTERN GEOGRAPHER

Author Guidelines

Southeastern Geographer is a peer-reviewed journal that publishes articles, research notes, and book reviews on all geographical topics with emphasis on the American South. It is published quarterly: March, June, September, and December.

For all questions, comments, or suggestions, please contact the Editors at:

Shrinidhi Ambinakudige & Brian Williams, Editors, *Southeastern Geographer*
Department of Geosciences
Mississippi State University
P.O. Box 5448
Mississippi State, MS 39762
segedit@geosci.msstate.edu

Online Manuscript Submissions: <https://mc.manuscriptcentral.com/segeographer>

Journal Content

Southeastern Geographer publishes four different types of content: Research Manuscripts, Reviews of Books and other Media, Cover Art, and Geographical Notes.

Initial Submission

Research Manuscripts

Manuscripts should be approximately 5,000–7,000 words in length, excluding footnotes and bibliography. The abstract should not exceed 200 words. If figures and tables are included, they should be limited to five each (ten total). References Cited should include recent (within the last two years) citations.

After initial manuscript evaluation by the Editors for suitability in *Southeastern Geographer*, manuscripts will be sent to a minimum of two reviewers for evaluation. Authors are highly encouraged to list the names of three to five potential external reviewers. Both author(s) and reviewers will remain anonymous throughout the review process. Most editorial decisions are made within 50 days of manuscript receipt. Manuscripts with either excessive grammatical errors or lacking clarity will not be sent out for peer review.

Geographical Notes

Southeastern Geographer publishes an occasional section (*Geographical Notes*) that contains manuscripts of five to ten pages in length focusing on significant developments in geography, contemporary issues of general interest, or field research observations related to the

southeastern United States. Contact the Editors at segedit@geosci.msstate.edu for more information.

Reviews

Southeastern Geographer welcomes reviews of books, atlases, software, video documentaries, and other media relevant to the journal and its readers. Contact the Book Review Editor directly for information:

Madhuri Sharma
Department of Geography & Sustainability
416 Burchfiel Geography Building
1000 Phillip Fulmer Way
Knoxville, TN 37996-0925
msharma3@utk.edu

All book reviews should use the following format:

[Initial upper case and boldface]. Author(s) or Editor(s). Place of Publication: Name of Press, Date. pp. [both Roman and Arabic numerals]; maps, diags., ills, notes, bibliog., index [include these as appropriate]. \$00.00 paper (ISBN); \$00.00 cloth (ISBN); \$00.00 electronic (ISBN).

The reviewer's information should follow the bibliographic information. Example:

Big City Grits: A New Geography of the Great Southern Breakfast.

Devyn Allen. Dothan: Southeastern Alabama University Press, 2023. xv and 213 pp., figs., bibliog., and index. \$15.95 paperback (ISBN 9980817959967).

Reviewed by Douglass Y. Green
The University of Tennessee

Reviews that include references should follow the formatting guidelines identified in this document.

Cover Art

Southeastern Geographer welcomes photographs, maps, art, and other figures related to the American South not under copyright protection as cover art submissions for the journal. Each issue will also contain a Cover Art section, in which contributors can provide up to 1000 words, including references, to explain the broader significance of their cover art. Please review prior issues of *Southeastern Geographer* for examples of essay format, including reference formatting and the inclusion of a bio sketch. The Editors reserve the right to send Cover Art

essays out for peer review, but in most cases, their revision and acceptance will be handled directly by the Editors. Contact the Editors at segedit@geosci.msstate.edu for more information.

A cover art contest will be open to registered participants of the annual SEDAAG conference. All cover art will be displayed in conjunction with the annual November conference, with voting by SEDAAG Members.

Research Manuscripts Formatting Guidelines

Electronic submission of manuscripts for review is done through the ScholarOne website: <https://mc.manuscriptcentral.com/segeographer>.

The cover letter should include names, affiliations, and contact information of all authors and include a statement that the manuscript has neither been previously published nor will be submitted elsewhere while under review with *Southeastern Geographer*.

The manuscript file should not include any identifying information. This includes names of authors, affiliations, biographical sketches, or acknowledgments. This information will be added to your final files if the manuscript is accepted for publication.

Manuscripts that do not meet the formatting guidelines will be returned to the author for revisions before initial review.

1. All parts of the manuscript (highlights, abstract, text, notes, references, tables, and figure captions) must be 12-point font, double-spaced, have the first line of each paragraph indented 0.5 inch (1 tab space), have 1-inch margins on all pages (including tables and figures), and be paginated.
2. For initial review, tables and figures should be included in the same file as the text, occurring immediately after being cited. Captions should be listed above the table and below the figure.
3. Manuscripts, except for highlights, abstract, references, tables, or figures, should be no longer than 7,000 words. The abstract should be no longer than 200 words.
4. The title should be chosen with care to appeal to a diverse audience and should represent the content of the article.
5. Authors should also provide a shorter running head no longer than six words. The running head should be included on a separate line, below the abstract.
6. Three to five keywords, which do not duplicate words in the title, should follow on a separate line below the running head.
7. Authors are required to provide highlights for their manuscripts. Highlights should consist of three to five bullet points < 100 characters each that convey the key results and conclusions

of the article. Highlights should be placed after the title and author page and before the abstract.

8. Only two levels of headings should be used to organize the text. Both should be left-justified. First-level headings should be all in caps (FIRST LEVEL HEADING), with no other special formatting (e.g., do not bold or italicize). Subheadings should use initial caps and be italicized (*Second Level Heading*). Numbered outline headings—4.1, 4.2, and so on—should not be used.
9. A limited number of informational notes may appear double-spaced on a separate page at the end of the text, before the *References Cited* section, and should be referenced in the text by numerical superscripts. In creating your notes, do not use Microsoft Word tools such as Insert Footnotes, as these embed macros into your document that must be removed for publication.
10. All tables and figures (maps, photographs, charts, and graphics) should be mentioned explicitly and in numerical order in the text using a leading cap (Table 1, Figure 1A). If a figure or table comes from another source, a full citation of that source should be provided in the references section and attribution should be placed in the figure caption. Authors should obtain any reprint permission necessary. See below for additional information on formatting figures.
11. Tables should be limited to five or fewer and should be 12-point font with 1-inch margins.
12. Figures should be limited to five or fewer, and should adhere to the following guidelines:
 - a. Figures must be provided AT SCALE (generated at the same size as will appear in the journal). Standard portrait positioning: maximum figure width (left to right across the page) is 4 1/2 inches and maximum figure height is 7 inches (figure caption will occupy one 1/8-inch line – allow 1/8 inch for each additional line). Rotated landscape positioning requires a 90° shift of page-to-read illustration.
 - b. Landscape positioning is reserved for figures with considerable detail, and such figures typically occupy a full page. The maximum length of the short axis is 4 3/8 inches and the maximum length of the long axis is 7 inches (figure caption will occupy 1/8 inch of short-axis length – allow 1/8 inch for each additional line).
 - c. EPS and PDF are the preferred formats for graphs, maps and line art.
 - d. TIFF, JPEG, PNG and PDF are the preferred formats for pictures, sized at a 6 inch width and a minimum of 300dpi. Please ensure that the image or figure has sufficient resolution that it will not show noticeable pixelation when published at scale. Any lettering embedded in figures should be a minimum type size of 8-point and a maximum of 12-point. Use only sans-serif type styles.
 - e. Use grayscale tones and a maximum of five data classes for choropleth maps (and other shaded-area figures). If more classes are needed, patterns can also be used.
 - f. For the final manuscript submission, each figure should be submitted as a separate file following the above guidelines. Files should be labeled as AuthorFigure# (e.g., SmithFigure1). All figure captions should be included as a separate file.

- g. All final figures MUST be included in grayscale for the print copy. You are encouraged to submit a color version of figure(s) for the online version (e.g., SmithFigure1Color).
 - h. You are responsible for any figure revisions required by the publisher. In case the publisher requires additional revisions or adjustments before printing, retain original versions of all graphic figures (whether composed in GIS, spreadsheet, or graphics programs) until the article has been published.
13. Miscellaneous formatting
- a. All measurements should be metric.
 - b. Equations should be centered on their own line and numbered sequentially in parentheses on the right margin. All terms must be defined where they initially appear as follows: $Q = 2.4Ad^{0.7}$ (1) where Q is discharge (m^3/s) and Ad is drainage area (km^2)
 - c. “Percent” should always be spelled in the text.
 - d. All acronyms should be spelled in the text the first time they are used, followed by the acronym in parentheses. For example, “geographic information systems (GIS)”. Acronyms should not have periods between the letters (US not U.S.).
 - e. All whole numbers from one to one hundred should be spelled unless they are paired with a mathematical symbol (e.g., $2 + 2 = 4$), abbreviation (e.g., 25 km, 16 cm), “percent” (e.g., 25 percent), or “score” (e.g., score of 57).
 - f. All quotation marks should be double with the exception being if material is quoted within a quote. In this instance, single quotes are used for the embedded quote. Direct quotes from secondary sources that are > 60 words should be set as extracts/block quotes (i.e., separated from surrounding text by one line at the beginning and one line at the end, and indented 0.5 inches on either side). Shorter quotes should be integrated into the text. Excerpts from interviews comprise the exception. Any interview excerpt of more than a single sentence in length should be set as an extract, no matter how long it is.
14. References cited in the text should appear in the *References Cited* section and vice versa. Please refer to the examples in Table 1.
- a. In the text, references should be cited parenthetically, rather than by a number: (Murphy 2010) or Murphy (2010); parenthetical listing of sources with up to two authors should include all author names (Smith and Jones 1991), while sources with more than two authors should be cited using the first author’s name followed by “et al.”: (Sanders et al. 1989). Parenthetical listing of sources in the text should be organized first by year, and then by the author(s) (Jones 1991, Smith and Jones 1991, Sanders et al. 1999, Murphy 2010). When specific pages are referenced, include the page number or range (Jardin 2018, p. 76; Andrews 1991, pp. 227-228).
 - b. Personal communications, software packages, and other unpublished work should be cited in their entirety in the text. Personal communications should include the following: name of the person, position, and organization (if relevant), date of communication, method of communication (fax, e-mail, letter, conversation, etc.). Software packages should include the name of software, version used, maker of software, city/state/country

of location of the software maker.

Revised Manuscripts

Authors revising manuscripts are required to use the response letter template (available online at: <https://sedaag.org/southeastern-geographer/>) when addressing reviewers’ comments.

Final Submission

The final versions should include the author(s), author affiliation(s) following the Title and Acknowledgments section immediately following the main body of the text. Tables may be included in your manuscript file but should be located at the end of the document. Each figure should be submitted as a separate TIFF file in the format described above. Each table and figure should be placed on a separate page.

Author(s) should submit a brief biographical sketch of each author, following the References Cited section. Please use the template: Dr. Evelyn Smith (evelyn.v.smith@seau.edu, @twitterhandle) is a Professor in the Department of Geography at Southeastern Alabama University in Enterprise, Alabama, 36330. Her research interests include political ecology, cultural geography, and landscape studies, with a special interest in the Southeastern United States.
